

Audax Private Equity

Audax Private Equity partners with management teams of established, market-leading companies with the vision and desire to create much larger entities through acquisition and organic growth. Audax' proven "Buy & Build" approach supports our management partners in executing add-on acquisitions, accelerating growth, and optimizing overall company operations to significantly increase equity value.

Since inception, we have invested over \$5 billion in 120 platform and 743 add-on companies. Our team is led by Co-CEOs and Managing Directors who have been together for more than 15 years. We have a dedicated team of 100 investment, transaction, and operations professionals delivering the expertise and experience necessary to build companies of substantial value.

Working with our management partners, we have repeatedly transformed market leaders into appreciably larger, better-positioned, and more valuable companies.

We are collaborative, committed, team-oriented partners who pride ourselves on being responsive and thoughtful. We bring the resources necessary to support execution.

- **Flexible.** We structure transactions for sellers whether they are owners staying with the business, owners seeking to transition out of the business, corporations divesting assets, or other financial sponsors seeking an exit.
- **Creative.** We accelerate organic growth within our platform investments with add-on acquisitions. Some companies have acquisition pipelines, while others need assistance in developing strategy, identifying and sourcing acquisitions, and/or integrating and maximizing the value of acquisitions.
- **Focused.** We work in teams, allowing us to move quickly through the transaction process and to support management partners during ownership. Each investment has a team of professionals who work closely with our management executives to provide access to internal resources and external relationships.
